Chile Uses Troops, Emergency Powers to Blunt Protests

By Our Staff From Santiago
SANTIAGO — Chile's military used Thursday to suppress protests by using troops, emergency powers, but business in Santiago stayed far from normal on the second day of a national strike. Armed cars guarded key roads, intersections and more buses on the streets Thursday, although fewer than usual. Many workers shared private cars with the center of the city. Civic Assembly, the opposition that called for the strike, slipped from public after the government said that they faced charges under security laws. Juan Luis Gonzalez, president of the assembly and of Chile's labor association, said Wednesday the work stoppage, which called for a general strike, had caused more disruption than any protest since the 1973 coup that brought General Pinochet to power. "We are the first time in the last 12 years the people of this country stood up en masse, united, and it is something historic," Dr. Gonzalez said at a news conference called before the government moved its legal action. "We and church leaders said 40 people were injured in clashes in slum areas Sunday night, but the death toll remained at three. At least 20 bombs went off in the central area of the city, with the most serious bringing down power lines, causing blackouts. Other burning buildings and factories, sources said. Radio stations broadcasting only music today after the authorities said news programs which were not including disturbances and later. "Some sources said the Radio Chile, which runs the four stations that make up the national network, was protesting the government to lift the ban on rallies from some oppositionist fact-protection for the columns supporting the strike, but none has yet been heard. "Students of wealthier areas said that many people Wednesday as they held rallies and houses to sit out on the city were crowded with people whose universities closed. "Thursday, troops surrounded as militant working-class groups in Santiago, where opposition is strong to General Pinochet's military government. Concepcion, Chile's second largest city (330,000) and the southern, said that the strike was spreading to the city and to the countryside and to the house-to-house searches, but two community leaders. "Public transportation in central area was running at half its normal rate but more people were

The sails of a yacht framed the Statue of Liberty on Thursday as celebrations got under way to mark the 100th anniversary of the statue and America's July 4th Independence Day.

Bells Peal To Start U.S. Liberty Fete

The Associated Press
NEW YORK — A flotilla of graceful sailing ships and hordes of small, bobbing pleasure boats from around the world paid their respects Thursday to the newly renovated Statue of Liberty as the president of the United States and France prepared to rekindle the monument's torch. It was the start of a four-day celebration of immigrant dreams and American accomplishments, marked by street fairs, fireworks and entertainment by star entertainers. The re-lighting of the electric torch also comes on the 210th anniversary of the American declaration of independence from Britain and will be accompanied by festivities throughout the United States. Churches around the United States rang their bells for 100 seconds beginning at noon after a service at St. Patrick's Cathedral featuring patriotic songs and prayer and a videotaped

North Koreans Accept Olympics Pact in Principle

By Patrick L. Smith
International Herald Tribune
HONG KONG — North Korea conditionally accepted on Thursday a compromise with South Korea on the staging of the 1988 summer Olympic Games, opening the way for the first substantial cooperation between the two sides since the Korean peninsula was divided in 1945. The North Korean government's consent to a proposal of the International Olympic Committee was announced by a committee spokesman in Lausanne, Switzerland. South Korea made known its acceptance of the compromise formula earlier this week. The decision appeared to mark a major advance toward averting a long-threatened boycott of the games by North Korea and some of its allies. "South Korea said yes," said Michael Verrier, the International Olympic Committee spokesman. "North Korea said yes, but." The spokeswoman said North Korea had agreed in principle to the compromise put forward by the IOC. The government in Pyongyang is expected to clarify its decision prior to an October meeting of the 91-member committee, which must approve the compromise. Further negotiations are to be held in the interim. The compromise provides for the Olympic competition in table tennis and archery to be held in Pyongyang. A portion of the soccer competition also would take place in the North Korean capital. In addition, a bicycle race would begin in North Korea and finish, about 60 miles (100 kilometers) away, in Seoul. The South Korean capital, which was designated as the site of the Olympics in 1981, is still retaining the 1991 events of the summer games. According to the original proposal, Pyongyang was to drop all

New Bombing Hurts 2 at Cape Town Police Station

Compiled by Our Staff From Johannesburg
JOHANNESBURG — Two white police officers were slightly wounded Thursday when a bomb exploded at a Cape Town police station. It was the 11th explosion since the declaration of a state of emergency June 12, the government announced. The announcement coincided with an official statement that three more blacks had died in an explosion Sunday, bringing the number of fatalities since the emergency was proclaimed to 100. Overall, about 2,000 people, the vast majority of them black, have died in violence and protest, centered on the nation's black townships since September 1984. Thursday's blast, at Mowbray police station in a white-only suburb, was the first since the emergency was declared at the security forces' security forces. Previous explosions have largely seemed directed at civilian targets. In the bomb explosion since June 12, three persons have died and about 100 have been injured, many seriously. The government has blamed the outlawed and exiled African National Congress for the explosions, but the congress, the most prominent of militant and outlawed movements seeking the violent overthrow of white minority rule, has declined to comment on them. Also Thursday, the government said it had arrested four congress members in connection with land mine attacks near Pretoria last month. The bureau also reported that the burned bodies of three black men had been found, raising the official death toll in South Africa

to 121 since June 12 to nearly 100. Fourteen other deaths have been reported by the authorities in local townships in two black townships. Emergency restrictions prohibit news organizations from reporting statements that the government considers subversive and from reporting on the activities of security forces. The regulations also prevent detainees from being identified by name. In Zimbabwe on Thursday, industrialists, most of whom are white, called for sanctions against South Africa. At a conference in Victoria Falls, the Confederation of Zimbabwe Industries approved

a resolution calling for "comprehensive sanctions against the Pretoria regime." In Zurich, a spokesman for Fritz Leutwiler, the Swiss banker chosen by South Africa to mediate with creditor banks, said Thursday that Mr. Leutwiler had resigned because of the emergency decree in South Africa. Mr. Leutwiler, however, said there had been a misunderstanding. Mr. Leutwiler, who negotiated the rolling over of about \$14 billion in debt in February, decided to relinquish his role because "he feels South Africa hasn't made sufficient political progress toward dismantling the apartheid system," according to the spokesman, Eric Hain. The spokesman said that Mr. Leutwiler's decision came shortly after the emergency decree was issued June 12 and that it had been relayed to South African officials. Later Thursday, however, Mr. Leutwiler said in Zurich that the reports of his resignation were based on a "misunderstanding" between him and the spokesman, Reuters reported. "I am not active for South Africa and the banks," he said. "I consider any mandate in February. There is nothing to resign."

ias Ruling Displeases Administration at Rights Groups Welcome Supreme Court Decision

By Linda Greenhouse
New York Times Service
WASHINGTON — William Ford Reynolds, the assistant secretary general for civil rights, has said that the Supreme Court's ruling on affirmative action was "appointing" and "extremely dramatic." Leaders of civil rights groups that they were pleased and moved by the decision Wednesday that held that employers might not discriminate on the basis of race. Reynolds, the official who spearheaded the Reagan administration's effort to limit the use of affirmative action remedies, acknowledged that the court had ruled in favor of the administration's position and that remedies should be limited to individually identifiable groups of discrimination. Reynolds also said he took comfort from aspects of the decisions that indicated that racial preferences would be the "least preferred" remedy, to be used only in extraordinary circumstances. "We have come a long way since we began our journey five years ago," he said, adding that when the administration began making its arguments, the tide was running out of the routine use of quotas. "We are pleased that the Supreme Court has reinforced the concept of affirmative action and has emphasized its value as a tool to help eradicate the present effects of past discrimination." The AFL-CIO said it was pleased that the court's action to clarify the standards governing affirmative action. "The labor organization added, "Now that the court has spoken, we can redouble our efforts to assure both vigorous

Soviet Arms Plan Poses Hard Decisions for U.S.

By Michael R. Gordon
New York Times Service
WASHINGTON — Recent Soviet initiatives at Geneva and elsewhere have stirred a debate in the Reagan administration over whether to accept limits on its anti-missile research program in return for strategic arms cuts. Up to now, the United States has not faced such a decision. Previously, the Soviet Union did not make any offer so extensive that the United States felt compelled to rethink its position on the Strategic Defense Initiative, the space-based missile-defense program widely called "star wars." When Moscow first said it would agree to deep reductions in strategic weapons, it asked for too much in return: a total ban on anti-missile research. Supporters and opponents of SDI were not prepared to abandon research. But the situation may be starting to change. Officials note that the Soviet proposals are not acceptable in strategic arms. The offer pertaining to strategic, or long-range weapons, is noteworthy because it removes stumbling blocks and hints at a possibility of further concessions. "There are no breakthroughs," an official said of the Soviet proposals. "They have the look and smell of opening moves in a real negotiation." The Russians, in a slight shift, would allow some research under the terms of an arms treaty and have suggested that there could be an even greater shift in allowing such research. The Soviet Union is now proposing somewhat higher limits on strategic arms. Its proposal also contains other shifts on strategic systems that are being welcomed. It drops Moscow's insistence for a ban of all long-range, air-launched cruise missiles. It says long-range cruise missiles could be permitted on submarines. Moscow has also dropped a demand that forward-based systems in Europe, meaning U.S. fighter-bombers in Western Europe and on

Chernobyl Fallout Still Clouds Future for U.K. Sheep Farmers

By Francis X. Clines
New York Times Service
BALA, Wales — Radioactive rain from the Soviet nuclear accident at Chernobyl has so polluted the green highlands around here that what the Welsh call the oen—the lamb—is now under government protection from slaughter until the last traces of fallout are gone. The government has imposed June 13, keeping an estimated three million lambs from going to markets from some of the most productive sheep farms in North Wales, Scotland and Cumbria in northern England. The ban is the only remaining official quarantine measure in Western Europe after the initial alarm arose in May over the April 26 accident in the Ukraine. These had included widespread European restrictions on the sale of produce and livestock. This is usually the peak lamb marketing season, but tens of thousands of animals a week are being spared from the market. The word lately for despair in Wales is

cwmwl, (pronounced COOM-ool), which means cloud, the nuclear cloud that drifted over the area and has been there for a week widely heard these days. "What's happened to the Sunday joint, Welsh lamb second to none?" asked Anthony Pugh, a lifetime sheep worker, rising the collar of the lamb market as the collapse of the lamb market as the collapse of a glass of whisky at the White Lion pub. All about him in the lush countryside, the quarantined lambs were chewing contentedly, using their extra weeks of life to put on the fat that can run a sheep farmer easily a lifetime sheep worker, rising the collar of the lamb market as the collapse of a glass of whisky at the White Lion pub. They drift much like clouds themselves across the upland hillsides as government technicians keep testing, hoping the level of radioactive traces will recede entirely soon and free the flocks for market. The radioactive elements involved, cesium 134 and 137, may be purged if present in small enough amounts, according to government scientists. The scientists say

they are being cautious in their methods to be more reassuring ultimately to the public. In Britain, the rain from Chernobyl brushed only parts of the west coast highlands, sparing vegetable and fruit farms. But shortly after the Chernobyl accident, sheep farmers' cash flow as citizens worried what was wrong with their restrictions were lifted after several weeks. In the pub, Bala's late sheep auctioneer, Richard Jones, had no answer to Mr. Jones' lament about the loss of the business except a promise to quickly kill all the suspect sheep, as with the hoof and mouth plague 30 years ago. Mr. Pugh, the former chairman of the 700-member Welsh Mountain Sheep Society, urged that "Welsh lamb is the only kind you can take without miffing jilly and it still tastes good." The Merin farm had to flee their home near the Salford nuclear plant in England a few years ago when local radioactive traces reached a dangerous level. They sought refuge as sheep farmers in Cumbria in northern England. There, the poisonous rain that fell on pastures May 2 and 3 found their flock, prompting sad words about the loss of the modern sheep family. One limitation was was announced June 13, the British appetite for lamb began dropping, deflating the market and the

Major Design Flaws Found in Delta or Titan; Post in Safety Is Urged

By Michael Isikoff
Washington Post Staff Writer

WASHINGTON — Investigators examining the explosion of an Ariane 10 rocket and a NASA shuttle last spring have concluded that there were no major design flaws in either system. The investigators recommended the adoption of better control and improved safety features before the vehicles are used again.

In another development, a European Space Agency board investigating the May 30 explosion of its Ariane 10 rocket issued a preliminary conclusion that some malfunction in the rocket's early ignition caused the accident.

It also reported, however, that "no manufacturing fault in any item of hardware of the engine or propulsion unit came to light."

A spokeswoman for Ariane Space, the French-dominated company that operates the rocket, said the European Space Agency's recommendations would require extensive new testing and that the company has not yet set a date for the resumption of launches.

The string of disasters afflicting the U.S. space program has raised doubts about quality control and testing in the aerospace industry. Analysts have cited a number of factors as contributing to the accidents: the diminishing frequency of unmanned rocket launches, insufficient testing of key systems, and the retirement of veteran engineers.

No Redesign of Booster
NASA said Wednesday that it planned to modify the flawed rocket joints that caused the loss of the Challenger rather than carry out a radical redesign or elimination of the whole joint. The New York Times reported from Washington.

John Thomas, who heads the agency's redesign team for the solid-fuel booster rocket at the Marshall Space Flight Center in Huntsville, Alabama, unveiled what he described as "the two alternatives" for redesigning the faulty joint.

The alternatives would change or eliminate various features of the joint that failed on the Challenger flight and would add some new features as well. But they would not require a major redesign of the entire joint configuration.

Pope Appeals for Peace and Justice, Urges Colombian Guerrillas to Disarm

By E.J. Dionne Jr.
New York Times Staff Writer

BOGOTÀ — Pope John Paul II said today that the Colombian guerrillas lay down their arms and "put an end to destruction and the deaths of so many innocents."

Speaking at a Mass on Wednesday to a crowd put at more than half a million, the pope made clear his uncompromising opposition to guerrilla violence.

"Unfortunately," he said, "many are in the contemporary world who have allowed themselves to be seduced by the temptation of armed violence, arriving at times at the irreparable extreme of terrorism, behind which lies destruction and death."

In a speech Wednesday to young people at a stadium in Bogotá, the pope urged the young to turn away from "the short point of struggle of brother against brother, young against young."

He linked his appeal for nonviolence with a call for social change. "Justice and peace cannot be separated," he told the diplomatic corps in Bogotá. "A peace which does not take justice into account would only be a mirage."

The pope's remarks went to the heart of the conflicts in a country that has known political violence off and on for three decades. A relatively well-off Third World nation, Colombia also suffers from the violent gaps between rich and poor in Latin America.

The political arm of one guerrilla group made public a letter to the pope Wednesday in which it complained about what it called "an atmosphere of horror" created by the government's war against its insurgents, estimated to number 20,000.

The Patriotic Union is the legal political arm of one of the two main guerrilla groups, the Colombian Revolutionary Armed Forces.

The chief Vatican spokesman, Joaquín Navarro Valls, said that the pope had not seen the letter and that it had been delivered to church officials, not to the pope himself.

The pope has decided not to meet with guerrilla groups. Vatican spokesmen have cited security considerations, the pope's full schedule and his policy of not meeting with armed opposition forces.

The court delivered 135 pages of opinions full of nuance and thoughtful distinctions, thus rejecting the broad prohibition urged by the solicitor general of the United States, Charles Fried.

"We have said that race-conscious remedies are not vicarious-specific are never permissible," Mr. Fried explained. "The court has said: 'Not never, but hardly ever.'"

In the New York case, the high court upheld a goal reminiscent for its specificity: 29.23 percent of the Hispanic members are to be black or Hispanic by Aug. 31 next year. It said this figure reflected the "percentage of nonwhites in the relevant labor pool" in the New York area.

The goal was first set by a U.S. district judge in 1975, and the deadline for compliance has been repeatedly extended. The Supreme Court took these extensions as evidence that the goal was indeed a goal to be reached for, not a rigid quota.

U.S., Cuba to Hold Immigration Talks

By Bernard Gwertzman
New York Times Staff Writer

WASHINGTON — The United States and Cuba have agreed to have an immigration agreement, according to Reagan administration officials.

The agreement was suspended by Fidel Castro, the Cuban leader, after the United States began broadcasts to Cuba by Radio Martí.

The scheduled talks are to cover both issues of immigration and radio broadcasts, the officials said. They said they expected Cuba to be reviving the immigration agreement, the most important agreement between the two countries.

Details were sketchy on what prompted the decision to hold talks on reviving the agreement. State Department officials said there had been confidential exchanges through the two nations' third-party representatives in Havana and Washington, leading to the decision to meet in Mexico City.

Relations between Cuba and the administration have been very tense. The United States has linked Cuba to the government in Nicaragua, whose opponents are being financed by American funds, and to military aid to rebel forces in Central America.

In addition, the United States has insisted that Cuba withdraw its forces from Angola as part of an overall settlement for the independence of South-West Africa, known as Namibia.

Bank Robbery in France
PARIS — A half-dozen armed robbers held up a bank Thursday in Saint-Nazaire, Brittany, and escaped with more than 40 million francs (\$5.7 million), the bank manager said.

The issue is the Justice Department's effort to revise a 1965 executive order under which federal contractors have been required to hire and promote women and members of minority groups. The order is enforced by the Labor Department, which requires many contractors to set goals to correct "underrepresentation" of women and minority-group workers.

The court did not pass judgment on the program for contractors. But the decision strengthens the hand of Mr. Brock in resisting the Justice Department's effort.

How to save a drowning man in a 35-knot crosswind

Rescue work at sea is seldom done in fine weather and calm seas. That's why the United States Coast Guard demands stringent requirements for its helicopters, including stability in flight — even in strong crosswinds — and protection against potential tail-rotor accident hazards.

To meet the Coast Guard's challenge, Aerospatiale used its innovative "fenestron" technology. Advanced technology first introduced in the Gazelle in 1966, technology which has consistently proven performance, stability, safety and reliability.

This proven technology has caught the interest of the U.S. Army. The "fenestron" has been requested in the specifications for the Army's next generation helicopter, the LHX. As we see it, advanced technology is synonymous with increased operational safety and reliability. This means adopting leading-edge technology to satisfy our customers' needs, which is one reason why the U.S.C.G. as well as fire departments, police units, hospitals, armed forces, and VIPs the world over place their trust in Aerospatiale... the world's leading helicopter exporter.

The court said that an employer and employees could voluntarily adopt broader remedies through a consent decree than a judge might have awarded after a trial.

...that's special...that's **aerospatiale**.

Israel: A Cover-Up Uncovered

The finger of political responsibility in Israel's Shin Bet scandal now points directly at Foreign Minister Yitzhak Shamir, who was prime minister in 1984 when the domestic intelligence service killed two captive Palestinian terrorists and then launched the process of covering up the crime. Legal papers filed before Israel's supreme court reveal that Avraham Shalom, then head of Shin Bet, admits he had no idea his men were killing. The papers also reveal that the head of the security service reported only to the prime minister. Mr. Shamir has thus implicitly accepted responsibility for knowledge and approval of his misdeeds.

Israel's political future may well turn on this accusation and evidence indicating that Mr. Shamir and later, Prime Minister Shimon Peres knew of the cover-up. Under the agreement that formed the coalition government, Mr. Shamir is scheduled to replace Mr. Peres in October.

Miss Liberty and Rambo: Two Sides of Same Face?

WASHINGTON — During May and June, Washington indulged in a particularly intemperate round of "Mexico-bashing." While the immediate effect was extremely damaging to the bilateral relationship, the venting of ill feelings on both sides may be a blessing in disguise. For, in the diplomatic rubble, Washington at last seems to see the need for a comprehensive and even-handed policy toward its neighbor.

The U.S.-Mexican relationship has been on a downward spiral since the start of Mexico's economic crisis in 1982. The antagonism came out into the open in May when Senator Jesse Helms, Republican of North Carolina, held the first of four public subcommittee hearings on Mexico. At the time, President Miguel de la M

SPORTS

Mandlikova, Navratilova in Wimbledon Final

By Robert Millward

WIMBLEDON, England — Martina Navratilova, gunning for her seventh championship and a first in the record book, and Hana Mandlikova, seeking her first title on London's grass courts, won in straight sets Thursday and sped into the Wimbledon women's final on Wednesday, the top seed from the United States, lost her serve just once in defeating 10th-seeded Czechoslovakia's Gabriela Sabatini 6-2, 6-2.

Mandlikova, the third seed from Czechoslovakia, had a tougher time before beating second-seeded Chris Evert Lloyd of the United States, 7-6 (7-5), 7-5.

Sabatini, who at 16 became the youngest women's semifinalist in the tournament, had not previously played Navratilova. Off this performance, when Navratilova took her apart, Sabatini may not be eager for a second meeting.

Navratilova looks service in the third and seventh games of the first set, and the first game of the second set, a game that went to double six times. She then won the second game at love.

Navratilova was handling the Czech's strong first service and had dropped her own serve on just one game, the sixth in the second set. It was only the fourth time in the tournament that Navratilova had lost a serve, and only the 25th time she had lost a set.

Navratilova took the back, her third break of the set, served out the match at 40-15, punctuating the victory with a pump of her right fist to the crowd.

"She played very well," Sabatini said. "My return wasn't working, or my serve. She's No. 1, and you get a little nervous."

Navratilova said she was very pleased with her play in the first set. "I'm moving better and serving better than I have in a long time," she said.

Navratilova then made three errors to give the Czechoslovak her first match point. Evert stated that off and went to break point with the help of an umpire's decision overruling a judge's call on a forehand Mandlikova hit down the line.

The response was momentary. A serve that kicked up in Evert's back brought the game back to love. A put-away volley gave Mandlikova her second match point. A backhand volley brought the winning point.

Mandlikova let out a yell, doubled over in joy, then skipped off court beaming.

Sabatini, who at 16 became the youngest women's semifinalist in the tournament, had not previously played Navratilova. Off this performance, when Navratilova took her apart, Sabatini may not be eager for a second meeting.

Navratilova looks service in the third and seventh games of the first set, and the first game of the second set, a game that went to double six times. She then won the second game at love.

Navratilova was handling the Czech's strong first service and had dropped her own serve on just one game, the sixth in the second set. It was only the fourth time in the tournament that Navratilova had lost a serve, and only the 25th time she had lost a set.

Navratilova took the back, her third break of the set, served out the match at 40-15, punctuating the victory with a pump of her right fist to the crowd.

"She played very well," Sabatini said. "My return wasn't working, or my serve. She's No. 1, and you get a little nervous."

Navratilova said she was very pleased with her play in the first set. "I'm moving better and serving better than I have in a long time," she said.

Martina Navratilova reaches to return a shot against Gabriela Sabatini, but was never stretched in gaining her seventh Wimbledon women's final, winning by the score 6-2, 6-2.

Mayotte Was Burned by a Meteor Named Lendl

By Peter Alfano

WIMBLEDON, England — After 3 hours 20 minutes of trading serves that often appeared to travel faster than the eye could see, the two players, in what was the fourth time in the tournament that Navratilova had lost a serve, and only the 25th time she had lost a set.

Navratilova took the back, her third break of the set, served out the match at 40-15, punctuating the victory with a pump of her right fist to the crowd.

"She played very well," Sabatini said. "My return wasn't working, or my serve. She's No. 1, and you get a little nervous."

Navratilova said she was very pleased with her play in the first set. "I'm moving better and serving better than I have in a long time," she said.

4-6, 3-6, 3-6, 9-7, in a match that was dramatic, if not memorable.

Lendl advanced to the semifinals, in which he will play the unseeded Slobodan Zivkovic of Yugoslavia on Friday. In the other semifinal, the defending champion, Boris Becker of West Germany, will face Henri Leconte of France.

Mayotte versus Lendl was the quintessential serve-and-volley match. Rarely did a fully exposed more than four strokes. It took the players more time to serve than to play a point. Lendl even received a warning for exceeding the maximum 30 seconds.

Perhaps, it was understandable. Every serve was vital. And never more so than in the decisive fifth set when a break point early on may as well have been a match point. Mayotte saved three such break points, but the struggle to hold his serve was wearying.

Lendl's serve, though, has never looked better on any surface.

"I was impressed with his serve," Mayotte said. "He did a good job of winning the first couple of points and I could never turn the corner. He didn't open the door at all."

That gave Mayotte a feeling he was behind throughout the match. And it put increasing pressure on him to hold his serve as the final set wore on. There are no breakers in a fifth set at Wimbledon, thus the possibility of delectable was introduced as another element when Mayotte prepared to serve, trailing 6-7, at 8:15 P.M.

Quickly, Lendl put him on the defensive, hitting a forehand return of a service winner. Then he caught Mayotte at the net, boldly hitting a topspin lob that landed on the baseline. "It was a meteor from outer space," Mayotte said. "I didn't know where it was landing."

Fatigue won the next point. Mayotte double-faulted, giving Lendl three match points. In a second set match won over Mayotte, the first match that Lendl ripped into the net.

On what would be the final point, Mayotte scurried to the net after his serve, looking to put away another volley winner. Lendl caught him with a topspin lob hand between steps, a few feet from the net. And that was what Mayotte attempted the drop shot that was so out of character.

"So understand you have to be at the other point," Lendl said. "He was at love-40 and knew the was going to hit out on every ball would not stop or think. I think was saying, 'I don't want this guy take a swing at me.' And he took a little. At a time like his eyes, feet and hands are tired. And you're nervous."

Blue Jays, Teammate Stop Clemens From Tying Mark

BASEBALL ROUNDUP

Compiled by Our Staff from Despatch BOSTON — The Red Sox's first

experts was detailed Wednesday night, though it hardly crashed and burned.

The only casualty, as the Toronto Blue Jays beat the Boston Red Sox, 4-2, before a Fenway Park crowd of 27,493, was Clemens' previously unblemished record and, of course, the well-publicized chance to join Dave McNally (Baltimore, 1969) and Johnny Allen (Cleveland, 1937) as the only pitchers in American League history to start a season 15-0. Robb Marquardt of the 1912 New York Giants led the major league mark of 19-0.

"I've seen him at his best, and I don't think this was his best tonight," said Toronto outfielder Jesse Barfield, who was out of the game for the first time in two weeks. "Any time a pitcher would want to beat Roger Clemens, they can say, 'He didn't break the record against me.'"

But for six innings the 23-year-old right-hander appeared to be about to do just that. He allowed only three balls to be hit out of the infield — one a home run by George Bell in the fourth — while striking out seven. Four strikeouts came in the first two innings, when, on a coiled night with a steady wind blowing toward right field, Clemens needed only 19 pitches to set down the Blue Jays.

In the seventh he walked two batters and although the Blue Jays did not score — the Red Sox led, 2-1, as the result of Marty Barrett's two-run homer in the fifth — Clemens' customary sharp control for a pitcher with a mid-90 mph (144 kph) ball was started to waver.

After a leadoff walk in the eighth to Ernie White, the No. 8 batter, Red Sox pitcher Bill Fingers, who had pitched to the mound, while Joe Sambrino and Bob Stanley began warming up in the bullpen.

Clemens then gave up a single to Damaso Garcia, putting runners on first and second, but turned a double play to end the inning. The next batter, Roger Maris, struck out. The next batter, George Bell, struck out. The next batter, George Bell, struck out.

End of Clemens' streak, end of Boston's six-game winning streak, end of Toronto's eight-game losing streak at Fenway.

"It's not fun to see it end," said Clemens, who gave up only three

BASEBALL ROUNDUP

hits and finished with eight strikeouts. "I want to start over again the next time out."

Brewers 1, Orioles 6: In Baltimore, Rick Cerone drove in an unseeded run with a fourth-inning sacrifice fly, following an error by first baseman Eddie Murray, and Ron Nix pitched a five-inning shutout for Milwaukee.

Twins 4, Yankees 3: In New York, Andy Pettitte and Dwight Gooden each drove in two runs as Detroit got 16 hits and Ron Guidry lost his seventh straight.

Indians 7, A's 3: In Oakland, Andre Thornton hit his third grand slam in the majors to help Cleveland hand the A's their fifth straight loss.

Rangers 10, Twins 2: In Arlington, Davey Lopes' home run with one out in the bottom of the ninth beat Montreal in the regularly scheduled game. Earlier, in the completion of a game suspended by darkness Wednesday, Jody Davis led a two-out single to center in the eighth to score the only run.

Pirates 4, Phillies 3: In Pittsburgh, Tony Pons' single scored pinch-runner Rick Rasmussen with two out in the ninth and beat Philadelphia after winning pitcher Rick Rhoden started the rally with his third hit of the game, a single.

Braves 7, Giants 4: In Atlanta, Omar Moreno hit a three-run homer driving in six runs in the bottom of the ninth to win the game for the best San Francisco.

Reds 4, Dodgers 3: In Cincinnati, Tony Perez, pinch hitting for Pete Rose, doubled with two out and the bases loaded in the bottom of the 10th after shortstop Bill Rouse had batted a potential double-play grounder. Los Angeles' sixth in one season there — while the Cardinals have been swept at home nine times this season. (L.A. UPI, AP)

LaRussa to Manage the A's: Tony LaRussa, fired 12 days earlier as manager of the White Sox, was hired Wednesday as the new manager of the A's, United Press International reported from Oakland. He was to join the team for Monday's game in Boston.

LaRussa will replace Jackie Mason, fired June 26 after the team's record dropped to 20-24, and interim manager Jeff Newman, the bullpen coach.

The A's also announced hiring Dave Duncan, a former major league catcher, as their new pitching coach. Duncan played with the A's from 1968 to 1972.

U.S. Crews Leave Opponents Gasping at Henley

By Sam Perry

U.S. Virgin Islands

HENLEY, England — Princeton University, the U.S. lightweight rowing champion, recovered from a bad start Thursday to out-muscle the Union Boat Club of Boston at the Henley Royal Regatta. The Union crew averaged 40 pounds (18 kilograms) a man heavier than Princeton's 35-pound crew.

In an extraordinary last-lap surge, Princeton trailed by up to half a length before pulling away in the 6-43.8-second (one-mile) mark of the 2,310-meter race.

Princeton, which last year defeated heavyweight Britain to gain the semifinals, pulled smoothly

past Union with a stroke that rattled its frustrated opponents.

"That's the best race of this regatta," said umpire Peter Croft, chairman of the regatta, as he waved the all-clear flag.

"He hasn't seen us race Gardsi Shokman," the Irish prize crew that won the 1985 Henley regatta, which Princeton is likely to face Friday, quipped Princeton stroke Henry Huntington after his boat crossed the finish line in 6:43.8 seconds, 15 seconds off the record, despite a moderate headwind.

In an even tighter match, Grotton School of Massachusetts lost by three tenths to an older Glasgow University crew in the Veterans Chal-

lenge Cup for contest four, after Grotton's Peter Scott nullified the British.

"We thought we would beat them on our conditioning," said Grotton stroke Tom Wright, who followed from Grotton and had to be lifted out of the boat.

In a Ladies Plate race for eight, Harvard's junior victory, which has lost only to its own freshman squad this year, convincingly beat the Thames Tradesmen's B boat.

Later, the undefeated freshman rowed through headwinds and some rough water to hold off the powerful Boston University victory row in the fastest time of the day, 6 minutes 30 seconds.

responded a bit too late," said Boston coach Bill Miller, who retired after the race.

The freshmen repelled a Boston surge with a mid-race grid that has been a hallmark, and Boston was unable to row through Harvard's final sprint, despite a wash of water in the Harvard lane.

"You don't paddle with this sort of competition," said Ted Washburn, Harvard's freshman coach.

Friday, in the quarterfinals, Harvard's freshmen will meet the Cambridge University and Goldie boat club that Thames Tradesmen A rowed in 6 minutes 41 seconds, the day's third fastest time.

Wimbledon

Meteor Named Leon

[illegible]

the peaks 17th stage July 20, with two peaks beyond category, the Izorad at 2,361 meters and the 2,413-meter Grasso, where the arrival is planned. The next day, July 21, starts with a chase up and over the Colibier at 2,460 meters and finishes with the traditional climb through a score of switchbacks to Alpe d'Huez at 1,860 meters.

The last climb beyond category is scheduled for the 21st stage, July 25, when what is left of the pack mounts 1,415 meters to the top of the Puy de Dôme in the Massif Central.

Does the race appear to be designed for climbers? Not really, said P. Louis Levitan, a Tour de France organizer, when he presented the course last year. "The winner can only be a complete rider," Levitan insisted. "A climber may, but with something else added."

He referred to the need to do well in the four time trials—three races against the clock by individuals, one by teams—when that sport along with the times to come. Here

is where such all-around riders as Bernard Hinault and Greg LeMond of the Vie Claire team and Laurent Fignon of Système U hoped to gain the minutes they expect to concede in the mountains to such climbers as Robert Millar of the Panasonic team, Pedro Delgado of PDM and Luis Herrera and Fabio Pires of Café de Colombia.

In addition, the all-arounders plan to set a rapid pace before reaching the mountains, hoping to leave the Colombians, especially far behind. "If we don't push Herrera 10 minutes back before we reach the Pyrenées, we're in trouble," Hinault, five times a winner of the Tour de France, has admitted.

So the first week, which will be spent on the flat and is usually time to conserve energy, probably will pass swiftly through the north of France, Normandy and Brittany. A race without tempo is indicated, except on July 23, a day off, if anybody needs one after the climb to Alpe d'Huez.

Marvin Hagler: "What I go through the family goes through."

Hagler on the phone at midnight Monday. "He said, 'How much money is there involved?' I told him many millions. Most of it, I think, is his. I said, 'Money's not everything. I got to do a lot of thinking.'"

If Hagler decides to fight again, said Petronelli, "it'll be Leonard or nobody. Forget Thomas Hearns."

With his wife Bertha at his side, Hagler has three of five children, but said his family was his prime consideration.

"First of all, my mother, my grandmother and my wife have always been looking forward to the day when I would stop up the game of boxing," he said, "and make money for myself. I made more money in the boxing game than what I ever intended to."

Hagler noted that he had two difficult fights in a row, with

Hagler, who has fought to a 60-2 record and has lost a bout in 10 years, commented that he was leaving open the possibility that he might fight again, but he said that he would "not be a fighter who haven't got right to the punchline of it. But it's coming."

"It's been a very long, hard, stressful fight," Hagler told everyone who's deserved a shot at the title. I feel as though I've been a cheap champion. So I think that I should have a shot at the title...to walk out as a proud champion."

Hagler's announcement came as a surprise to Bob Arum, head of Top Rank, who had hoped to place a major part in promoting Hagler-Leonard bout. Arum said he had thought that Hagler was going to announce that he would "be a boxer who has not been a boxer" instead of certain "boxer decisions."

But moments before Hagler was to meet the press, he had Arum's attention. "I'm not going to fight," he told him, according to Arum, Hagler told him "with tears in his eyes that he was thinking about retiring and that he was going to be a manager within a month, according to Hagler's manager, Pat Petronelli."

Petronelli said he spoke with

"You know it's got to be my family," he said. "Coming home with a lot of busted eyes and busted nose and aches and pains. What I go through, what the family goes through."

"I've made enough money in the game. So let's move out while we still have our health and while I still have my faculties together."

"When you get out, you don't want to be like Muhammad Ali."

Agence France-Presse

TOKYO — A growing number of elderly Japanese are enjoying the excitement of golf, the intricacy of billiards and the team spirit of football with no fear of cramps or a heart attack.

The name of the game is gatchai, which is a Japanese phrase that means "your muscles," said Hideo Saito, 67-year-old retiree.

"Without elaborating a strategy, your ball will be easily blocked and smashed out of the court by your opponents," he said.

Gatchai was derived from crosk, which was introduced in Japan years after World War II ended.

History books say that one

tional chess champions, poisoned himself with a weed killer in May this year. He then failed to qualify this year.

According to his son, Noguchisuzumbe before his death: "We have lost at gateball. Things didn't go as I had hoped. There is a world of things coming up and it's all over now."

A member of the Maebashi Gateball Club remembered Noguchisuzumbe as a "competitive and hard" said, "The palms of his hands were covered with calluses. He was not satisfied until he had knocked 500 or 600 balls out of play."

The Japan Gateball Union, headed by Ryoichi Sasagawa, known as the "don" of the lucrative boat-racing industry, now hopes to get the younger generation involved in the sport.

Gateball clubs have been formed by some university students and a handful of grade schools have included the game among their extracurricular activities. But most youngsters still regard gateball as a sport for the older set.

Gateball is not an image problem," said Hirano, "but when you look at this, it's rather concerning." He was pointing to a pile of gateballs lying on the ground. "It's a pretty bright pink sweatshirt."

Soccer Bans in Portugal Cause Furor

On Wednesday the soccer federation "definitively removed" eight players from the national squad: Benfca's Bento, Carlos Manuel and Diamantino; Porto's Andre and Jose Pinto; Belenense's Jose Antonio and Paulo; and Sporting's Roberto. The federation also suspended payment of World Cup prize money until completion of an inquiry ordered into the actions of the entire 22-man team.

Olympic champion Carl Lewis will compete next Friday in the 200-meter race at the Peugeot Talbot Games in London, organizers said, along with world record-holders Willie Banks in the triple jump, Calvin Smith in the 100 and Johnny Gray in the 800. (AP)

Breakaway

On the Road with the
Tour de France
Samuel Abt

An illustrated look at the world's most famous bicycle race.

Samuel Abit, an editor of the International Herald Tribune, has been covering the Tour de France for nine years.

Here's his fresh, passionate account of the extraordinary 1984 race — complete with in-depth profiles of the three top finishers and vignettes of scores of other riders, coaches and spectators.

...a sure winner... as the Tour de France is more than a bicycle race, Abit's "Breakaway" is more than just another look on cycling." Dan Giesin (San Francisco Chronicle).

...a combination of history, history and, of course, description of the race itself... this wonderful book's narrative moves faster than the riders." Steve Tesich (New York Times Book Review).

...engrossing look at the Tour de France and its three yearly stars." Roger Moore.

Breakaway. Hardcover, 224 pages with 24 pages of photos, 7 3/8 x 9 1/4 in. (18.5 x 23.5 cm). Published by Random House. Available by mail from the International Herald Tribune. Order today.

Portuguese Socialists
Elect New Leader

LISBON — The Portuguese Socialist Party elected Vitor Constâncio, 42, an economist, as its new leader at the 15th party congress last week. Mr. Constâncio, a former finance minister, resigned as secretary-general of the Bank of Portugal to run for the post of party secretary-general. He succeeded Mário Soares, who was elected president of Portugal in February. Mr. Soares stepped down as secretary-general when he announced his presidential candidacy, saying that he thought the two posts were incompatible.

The choice was no surprise: about 80 percent of the delegates had already declared their intention to vote for Mr. Constâncio rather than for his opponent, former Foreign Minister Jaime Gama, who was supported by Mr. Soares. Mr. Constâncio heads a team of Socialists who say they intend to modernize the party and win back the absolute majority in parliament that it lost in elections in October.

The socialist congress that elected Mr. Constâncio also decided to make party leaders accountable to the congress. Under Mr. Soares, power was concentrated within a small national executive council that he dominated.

Spain Defines Status
Of Ethnic Languages

MADRID — In line with Spain's continuing effort to give ethnic regions more autonomy, the Spanish constitutional court last week approved the local language laws of three autonomous regions. The court ruled that the Basque country, Catalonia and Galicia had the right to teach and use their own languages. But the regions are not allowed to make the teaching of any language compulsory except for standard Castilian Spanish. Nor can they forbid the teaching of Spanish rather than the regional language.

The ruling declared unconstitutional a paragraph in the 1983 Galician law stating that it was the duty of every Galician to learn the local language. It also rejected a paragraph in the 1983 Basque law requesting that the administration of the local government use only Euskara, the Basque language. Castilian was the only officially recognized language during Franco's 36-year dictatorship, which ended in 1975.

In November 1984, the latest date for which figures are available, there were 1,655 such zones around the world.

LONDON — For the first time in Britain, a motorist was found guilty this week of drunken driving and was banned from driving for one year even though the driver had no previous record.

The motorist, a 35-year-old man, was found guilty of driving with a blood alcohol level of 0.15 percent, which is twice the legal limit. He was fined £1,000 and banned from driving for one year.

OLYMPICS:

Accord Nearer

(Continued from Page 1)

Wednesday followed three rounds of negotiations. At the most recent talks, held on June 10 and 11, the committee presented its formula and set a deadline of June 30 for the two sides to reply.

Both North and South Korea presented letters to the International Olympic Committee on Monday.

In earlier talks South Korea had agreed to allow North Korea to host most of the preliminary rounds of several events, including soccer and volleyball.

Under the pending agreement, North Korea is to stage two events from preliminary rounds through the finals.

Pyeongyang had repeatedly signaled its reluctance to accept the compromise formula since it was proposed. But Western analysts suggest that its agreement, although conditional, appears to signal its failure to mount sufficient support among its East-bloc allies to sustain a boycott of the games, based on its previous demand for equal status as a sports nation.

"The North wants to project the games as co-hosted," a Western diplomat in a telephone interview from Seoul. "I don't think they liked the terms offered, but possibly they didn't have much choice."

Seoul has long viewed attendance at the 1988 Olympics as the key measure of its acceptance in the international community.

In recent months China, the Soviet Union and a number of other European countries have distanced themselves from a potential boycott, while still paying lip service to the North Korean position, according to Western analysts.

Because many Communist countries boycotted the 1984 Olympics in Los Angeles, one key concern among them is the virtual loss of a generation of Olympic athletes.

The United States and West Germany have recently offered North Korea full support on the Olympics issue.

In April most East bloc countries, including the Soviet Union, sent representatives to a meeting of national Olympic committees held in Seoul.

Deng Xiaoping, China's leader, offered a cigarette Thursday to Jacques Delors, president of the European Commission, at a meeting in Beijing. Mr. Delors refused it.

China and EC Seek Nuclear Safety Accord

Beijing

BEIJING — China and the European Commission are working toward an agreement on sharing nuclear power safety techniques, an EC official said Thursday.

Jacques Delors, president of the EC's Executive Commission, said a Chinese mission visit Brussels in October to discuss the plan. "If all goes well, we could conclude a cooperation agreement

in 1987," he said at a news conference. "Radioactive clouds have no frontiers."

China is building two nuclear power stations, one near Hong Kong and the other near Shanghai. It intends to build others to meet growing power needs.

Since the Soviet nuclear power station accident in April at Chernobyl, Chinese officials have been stressing that safety requirements will be paramount in China's plants.

Delors said the agreement would be a milestone in the development of nuclear power in China.

NEW YORK

Tourism Boom Fuels New York City Growth

Big Apple tourism continues to flourish. Last year alone more than 17 million visitors spent a staggering \$2.4 billion in the city, making the tourist business New York's number-one growth industry and dropping tax revenues of \$225 million directly into the coffers of all five boroughs.

Particularly notable were increases in convention visitors, to nearly 4.4 million, and in overseas visitors, to 2.4 million in 1985. Said New York Convention & Visitors Bureau chairman Robert Tisch: "The latter rise reflects the strengthening of foreign currencies against the dollar in the second half of the year, as well as the Bureau's stepped-up and highly successful overseas marketing."

And the momentum isn't about to stop. The city's intent is to encourage this thriving business through improved facilities, widespread advertising, and the promotion of a broad range of citywide services and events. Citing the Statue of Liberty centennial celebration and last April's opening of the huge new Jacob K. Javits Convention Center, Tisch said 1986 will go down in history as one of the most memorable years ever for New York tourism.

Competitive hotel scene. Vital to the continued success of New York City tourism is utilization of the hotel rooms added to the market in recent years. The first wave of construction, in 1980-81, added 6,428 rooms in seven hotels. Since 1982, an-

other 3,186 rooms have been added to six hotels.

All in all, according to Bureau statistics, the total number of hotel rooms in all five boroughs is more than 100,000. Despite this flood of space, however, 1985 occupancy figures citywide remained above the national average, at 72 percent.

Still, hotels are finding it increasingly necessary to jockey for position in this crowded environment, by improving existing facilities, broadening their range of services, and brushing up on marketing techniques. Many established names—such as the Waldorf-Astoria, Plaza, Sheraton Center, St. Regis Sheraton, and Essex House—are updating, or have recently completed, major structural renovations. Others are adding on-site health clubs and improving restaurants and room service facilities. The fact is that, as never before, a unique hotel personality, combined with undivided attention to the whims of each client, is crucial to maintaining a strong profile in this competitive market, and to securing the loyalty of vacation visitors and frequent business travelers.

One of the best, the Carlyle, has won the prestigious Mobil Five Star award 18 years in a row. Priding itself on the excellence of its staff and a vast range of services, the hotel also boasts an Upper-East-Side location convenient to major galleries, antique dealers, and auction houses of distinction.

A New Look for an Old Lady

After all, she's an immigrant herself. Born in France, she arrived in the United States when barely a year old, in 214 packing cases. So it seems especially apt that the Statue of Liberty, whose centennial is being celebrated this weekend with an extravaganza not seen in these parts since the Bicentennial extravaganza of 1976, has come to symbolize the Great American Promise. She is, like so many people, products and ideas crucial to the nation's history, an import that made good.

For a hundred years, the statue officially known as "Liberty Enlightening the World" has tirelessly raised her torch and

dropped her tablet in New York's bay. But even a statue doesn't put in a century on the job, year in and year out, in all weathers, without showing signs of wear and tear. In 1982, David L. Moffitt, the monument's superintendent, admitted that "We've found portions of the statue out in the bushes."

With Liberty's 100th birthday just a few years down the road, a major facelift was in order. For 20 months, the 151-foot (45-meter) statue was sheathed in 300 tons of aluminum scaffolding. Inside, approximately 1,700 iron support ribs were

measured, copied in stainless steel, and replaced. Layers of paint were removed with liquid nitrogen, and a warm-based zinc primer, developed by NASA for the space program, was used on the structural supports. The spiral staircase was refurbished and a new glass-walled hydraulic elevator—the tallest in North America—installed. Further improvements included extra access for the disabled as well as other amenities designed to accommodate some 2 million visitors a year.

Outside, the seven spikes in Liberty's crown—representing

the seven seas and continents—were restored, and 2 percent of the statue's hammered-copper skin, which had been lost to corrosion, was replaced. In perhaps the most painstaking aspect of the restoration, Liberty's torch was removed and replaced.

Ironically, the new torch is the one sculptor Auguste Bartholdi intended all along. In his original plan, the flame was to be made of copper sheathing and covered in gold leaf, to reflect exterior light. When the statue was erected in New York, however, American engineers discovered that the torch would

(continued on next page)

A Taste of the Big Apple

From haute cuisine to the ubiquitous sidewalk carts, New York offers nearly every imaginable type of food, with settings and prices to fit all tastes. According to the New York City Restaurant Association, the city has a gargantuan 25,000 restaurants, making the decision of where to eat a challenging one for even the best-informed.

To make the task a little easier, help is available: The New York Convention & Visitors Bureau publishes the New York Restaurant Guide, a pocket-size directory to a wide range of eateries. For a free copy, write to or stop by the NYC Visitors Bureau at 2 Columbus Circle, New York, N.Y. 10019.

A few pointers: If in doubt, make a reservation. Well-known spots may be booked weeks in advance. And having a heavy appetite: New York restaurants are known for generous servings.

For pre-theater dining, a word to the waiter should ensure that you're out in plenty of time to make the curtain.

And don't be afraid to follow a whim—many delectable dishes are waiting in restaurants just off the beaten track.

Here are some favorites:

UPPER EAST SIDE

Buena Vista Cafe
1575 1st Ave. (at 74th St.); 772-8508; Moderate.

Turn-of-the-century decor and Hungarian specialties make this a romantic choice. Try the *Gemüdt polenta*.

Elaine's
1703 2nd Ave.; 534-8105; Moderate.

The Italian food isn't outstanding, but the company more than makes up for it. Come rub elbows with a room full of luminaries.

Ross Mediterranean
1063 1st Ave.; 753-7407; Moderate.

Spicy, delicious guacamole made fresh at the table in large stone crocks. That, plus fresh margaritas and imaginative touches that go beyond the usual enchiladas and burritos, add up to a winner.

Sarahbeth's Kitchen
1295 Madison Ave. (between 92nd and 93rd Sts.); 410-7335; Moderate.

Attractive atmosphere and wonderful food. Be sure to save room for Sarahbeth's specialty-rich pastries.

UPPER WEST SIDE

Blue Nile
105 W. 77th St. (at Columbus Ave.); 580-5253; Inexpensive.

Ethiopian home cooking served at tables made of woven baskets. Wide range of meat, fish and vegetable dishes ranging from tame to spicy, in relaxed atmosphere.

Ginger Man
51 W. 64th St.; 599-2558; Inexpensive.

Right across from Lincoln Center, this casual, crowded eatery serves continental cuisine and Bloody Marys with a kick. Szechuan West

2656 Broadway (between 100th/101st Sts.); 665-9280; Inexpensive.

Possibly the best sesame (continued on next page)

A RICHER EXPERIENCE.

Pan Am is doing many things, in the air and on the ground, to make sure our First and Clipper® Class passengers get the treatment they so richly deserve.

MORE COMFORT THAN EVER IN CLIPPER CLASS.

Our Clipper Class service will be renewed and made better in virtually every way. With new fabrics, carpeting and curtains everywhere you look. And with handsome new tweed seats, arranged six-across on every 747 we fly, to give you more room to work or relax than you'd get in some airlines' First Class sections.

In Clipper, on all our 747s, our new tweed seats will be arranged six-across, as before, to give you more room to work or relax.

MORE LUXURY THAN EVER IN FIRST CLASS.

Over the next few months, we'll be completely renewing and redesigning the First Class sections on all our 747s, starting with our transatlantic and domestic USA fleets, and following soon after with our planes on the South America, Asia and Africa routes.

We'll have bright new interiors, innovative new cuisine, and beautiful new leather-and-sheepskin Sleeperette® Seats so soft, they literally mold themselves to your body.

A PRIVATE TERMINAL JUST FOR YOU IN NEW YORK.

Our new First and Clipper Class Terminal at JFK Airport will let you experience new heights of luxury and comfort even before you leave the ground on your trip back from New York.

Here you can relax in an atmosphere more reminiscent of a fine hotel than an airport, while a friendly helpful staff attends to all your travel needs. So fly with us soon and get the treatment you so richly deserve.

Our new First Class Sleeperette® Seat will cradle you in buttery-soft glove leather and plush sheepskin.

You won't be checking in at our new terminal; we'll do it for you.

For reservations and information call your Travel Agent or Pan Am.

● Pan Am. You Can't Beat The Experience®

Pan Am's All-New First Class & Clipper Class.

Manhattan: A Mecca for Shoppers

It is possible to spend a day in New York City visiting the galaxy of shops, boutiques, and not a few department stores, all of which are precisely what you need for a range of needs and prices for every occasion.

During the last few years, the lure of Manhattan, and in particular the four boroughs, has been a magnet for shoppers. The New York Convention Center, which opened in 1985, has been a magnet for shoppers. The New York Convention Center, which opened in 1985, has been a magnet for shoppers.

Each year, the Big Apple spend a \$2 billion in New York City. That's not all. It's a sampling of what's available in the city's vast array of shops.

Manhattan is home to the world's most famous shopping district. From 62nd Street to 130th Street, there are shops, boutiques, and department stores. The city is a shopper's paradise.

Manhattan is home to the world's most famous shopping district. From 62nd Street to 130th Street, there are shops, boutiques, and department stores. The city is a shopper's paradise.

Manhattan is home to the world's most famous shopping district. From 62nd Street to 130th Street, there are shops, boutiques, and department stores. The city is a shopper's paradise.

Fifth Avenue has long been synonymous with affluence, with stores catering to the tastes of the wealthy. Tiffany's, 727 Fifth at 57th, is famous for distinctive jewelry, sterling silver, crystal and gifts.

A plaque outside the Trump Tower, Fifth at 57th, reads: "Welcome to the World's Most Extraordinary Shopping Experience." The gallery of fine shops displays a wide range of goods including antiques and fine gold and silver jewelry.

Scheduled to open in 1987, Place des Antiquaires will be a showcase of the world's finest antiques and art. Ninety specialty shops, two cafes and an exhibit hall will be housed within two full concourse floors at 135 E. 57th St. Already, retailers from around the world, including Becca Fine Paintings, Henryk Domagala, Ben-Gurion Associates, and Tradex, Inc., have negotiated multiyear contracts for more than half the center's space.

At Bergdorf Goodman, Fifth Ave. between 57th and 58th, there are men's and women's designer clothes, sportswear and accessories. On the main floor is a fine collection of Art Deco-inspired jewelry.

Fortunoff, 681 Fifth (near 54th), has a dazzling array of colorful pearls, black onyx, diamonds, emeralds, sapphires, and low-priced sterling, all-weather and power giftware.

Sales Fifth Avenue, 611 Fifth (between 49th & 50th), has long offered the finest in

taste and style. There are elegant designer shops and a newly expanded gift department which offers fine crystal, sterling silver and antiques.

UPPER WEST SIDE
Columbus Avenue, from 72nd up to 85th, is anything but mainstream. Introducing the many eating places and pubs on Columbus are small specialty shops and boutiques with merchandise from vintage wear of the Fifties and Sixties to designer clothes and jewelry.

Screaming Mimi's, 495 Columbus (corner of 86th), displays costumes and formal wear; seven-woman Elifacs and Sixties shops, party dresses and new clothing and accessories.

Parachute, 309 Columbus (at 77th), features its own private-label fashion with styles ranging from conservative to outrageous. The staff are "living mannequins" — they dress

Macy's New York, the largest store in the world.

in the store's merchandise to show customers different looks. Mythology, 370 Columbus (at 78th) is an eclectic place for novelties and gifts: rubber stamps, masks from Sri Lanka, posters by contemporary artists, art books and ceramics.

Alice Underground, 380 Columbus (at 78th), has a collection of vintage clothes for men, women and children.

Christophers on Columbus, 454 Columbus (at 82nd), offers an array of gifts from signed and numbered original art glass to bronzes and Art Deco reproductions.

MIDTOWN
Macy's New York, Broadway at 34th, the largest store in the world, has a wide merchandise selection and some of the best prices in town. Across from Macy's is Herald Center (corner of Broadway), housing boutiques and specialty shops. Try Brookstone on the 7th floor for novelties and gift-croquet sets, safari helmets,

grass sandals. Barney's New York, located at 7th Avenue (at 17th), is a veteran men's clothing store with a large selection of American and international designer suits and sportswear and accessories as well as clothes for women.

SOHO
This area, bordered by Broadway, West Houston Street (pronounced "how-stor"), Canal Street and Avenue of the Americas, is New York's art colony, with fine galleries, shops and restaurants catering to avant-garde tastes.

The Gallery of Wearable Art, 480 West Broadway. Here, 500 artists and designers contribute designs for the store's extraordinary gowns and costume jewelry collection.

At Susanne Bartsch, 466A West Broadway, a boutique designed like a "ship in a bottle," according to the owner of the same name, one will find stylish casual wear, handmade jewelry and accessories.

La Rue des Rêves, 139 Spring Street, is the epitome of Soho chic. They have leather, suede and silk "dress" clothes, some designed exclusively for the store; some one-of-a-kind sterling; and 14-karat gold overlay jewelry.

Not to be missed is The Canal Jean Co., 504 Broadway (between Spring and Broome streets), a funky department store that offers much more than jeans.

SOUTH STREET SEAPORT

People come here by the busload to shop, browse, eat and have fun. At Hula In The Belly, on the main floor of Pier 17, shoppers try on male and eagle hats, safari hats with solar fans, theatrical hats, even beer bud- dies has holding two or four beer mugs, complete with straw.

At Puro Real are brass, bronze and papier-mâché animals. All are limited-edition pieces by Sergio Busanemati. And Novelties abound at The Sharper Image, Pier 17, from a grand piano telephone to tiny tennis tables.

— Jean Muir

LIVE IN NY

(continued from previous page)

Continental menu, average price \$12-\$20. Dress: Informal. July 1-4...Horace Silver; 6-13...Stanley Turrentine, Kenny Barrill and Jimmy Smith; 22-27...Dave Valentine and Michel Camilo; July 29-Aug 3...Phyllis Hyman; Aug 3-10...Mik Jackson and Ray Brown; 12-24...Chuck and Ray Mangione; 26-31...Dizzy Gillespie.

Carlos L., 432 Sixth Ave. 982-3362. Cover: \$10. Minimum: \$7. Dress: Informal. Food Jamboree and seafood specialties, average price \$13-18. July 1-4...World Saxophone Quartet; July 15-Aug 3...Oscar Brown Jr.

NYC Business News

Not all visitors to New York can afford to leave their business affairs behind. But for executives on the road, such simple tasks as making phone calls, sending and receiving correspondence, or holding meetings can be problematic. Secretarial services and food business centers can fill basic needs, but frequent travelers can require a more specialized and continuous support network. Filling this gap for visitors to Manhattan, World-Wide Business Centers' fully equipped midtown headquarters (605-0200) provides a full range of office services to executives on the move.

Besides the New York center, World-Wide has satellite offices throughout the U.S. and overseas.

Those planning a more substantial investment of time in the city may be considering a financial investment as well. On the commercial real estate front, Edward S. Gordon Company, Inc. will assist with commercial leasing, consulting, investment sales and property management. (403 Lexington Ave.; 984-8000). And BBIG Realty Corp. specializes in residential relocation for executives and corporations moving into New York (328 E. 61st St.; 308-2060).

For those in the market for a truly one-of-a-kind property, in Manhattan or beyond, Preview's publication "Guide to the World's Five Real Estates" is a breathtaking fine stop. Guided by the motto "Extraordinary properties require extraordinary sales efforts," Preview specializes in such diverse properties as a residential lighthouse and a Japanese palace, dismantled, boxed for shipment, and pre-blessed by a Shinto priest.

DUTY. FREE.

There's the stewardess who smiles because she has to. And there's the stewardess who smiles because she wants to. The mechanical versus the natural.

Obviously, this being an advertisement, we're saying that our girls smile because they want to.

How can such a claim be true?

Come back with us to a selection interview. We're looking for girls who genuinely like looking after people. Who want to make them feel welcome.

Who, in the words of one of our commandments on service are happy to agree that the passenger brings us his wants, it is our job to fulfil his needs.

We thus gently discourage the would-be model who sees the passenger aisle as her personal catwalk.

Her heart just wouldn't be in it. And it shows.

There's one other very important difference. We're an independent airline. Not government property.

Which gives us an in-built desire to make your flight as enjoyable as possible. That's why we're genuinely happy to welcome you on board British Caledonian.

But would be most upset to **British Caledonian Airways** see you go elsewhere. We never forget you have a choice.

EC Calls Meeting On Steel Quotas

BRUSSELS — European Community delegates agreed Thursday to call a special meeting of ministers after failing for a third time to agree on the sharing of a U.S. quota of 800,000 metric tons (\$80,000 short tons) on EC exports of semi-finished steel products.

Toyota Raises U.S. Prices

TORRANCE, California — Toyota Motor Sales USA said Thursday that it is raising the suggested retail price of its 1986 Supra by an average 5.5 percent and the price of its cargo van by 2.2 percent, effective immediately.

Taiwan Ford Plans Export

TAIPEI — Ford Motor Co.'s Taiwan subsidiary announced Thursday that it will export about 12,000 subcompact cars to Canada between July 1986 and June 1987.

Floating-Rate Notes

The units contain the following features:

- Shared ownership and use of five premium facilities and full-service recreational facilities including indoor racquetball court, exercise room
- Ownership of 35 parking spaces
- 24-hour building security;
- Access to public transportation

Conditions of sale are available at the

"Profit attributable to shareholders at a record high"

RW Rowland, Chief Executive

Dear Shareholders,

It is with pleasure that I am able to present the half year figures with an increase in profit before tax to over £71 million and profit attributable to shareholders at a record high.

Profit attributable to shareholders at £34.7 million is up by 20% compared with last year and earnings per share have risen by 18%. The second interim dividend has effectively been increased by 10%, as a dividend of 4.00 pence per share has been maintained on the increased share capital following the 1 for 10 capitalisation issue.

Our African companies have traded very well during the last six months. Companies operating in some of these areas have been affected by adverse exchange rate movements, and the result has been to reduce profit when reported in sterling. The substantial profit improvement in our U.K. activities has had a beneficial effect on our results, thereby enabling us to report an overall increase in both profit before tax and profit attributable to shareholders.

Our hotel interests in the United Kingdom have performed well, but the results of Princess Properties International have been affected by the decline in the U.S. dollar and a short term reduction in the popularity of Mexico as a holiday location following the earth tremors. The opening of our new casino in Queensway, London proceeded successfully, and this casino is a fine addition to our prestige gaming activities.

Production at our mining operations has increased, as compared with last year.

The acquisition of ten Scotch whisky brands, including the famous Haig brand, by our subsidiary, Whyte & Mackay, has further strengthened their position by making them the second largest distributor of Scotch whisky in the United Kingdom.

The Group's printing and publishing operations have reported a marked increase in profitability, which is a very pleasing result in these highly competitive markets.

I am confident that the Group's pattern of consistent growth will be maintained during the rest of 1986.

*Yours sincerely,
RW Rowland*

3 July 1986

The unaudited results of the Lonrho Group of Companies in respect of the six months ended 31 March 1986 are as follows:—

	6 months to 31 March 1986	6 months to 31 March 1985
Turnover	1,266.0	1,276.6
Profit before tax	71.1	70.7
Tax	30.1	35.4
	41.0	35.3
Minority interests	6.3	6.5
Profit attributable to shareholders		
before extraordinary items	34.7	28.8
Earnings per share	11.7p	9.9p

Notes:

- The Group's share of the turnover of associates for the six months ended 31 March 1986 was £277.7m (1985—£328.8m) and is excluded from the above.
- Profit before tax includes profits from associates of £15.4m (1985—£16.6m).
- Tax charge: because of the incidence of accelerated capital allowances, the tax charge provided at the half year can only be estimated.
- Earnings per share have been adjusted for the capitalisation issue on 25 April 1986.
- Extraordinary profits £4.9m (1985—£47.4m).

Dividend

The Board has declared a second interim dividend of 4.00p (1985—4.00p) per share (equivalent to 5.638p per share including the related tax credit) for payment on 1 October 1986 to shareholders on the Register at 29 August 1986. This dividend is in addition to the first interim dividend of 1.00p (1985—1.00p) per share (equivalent to 1.428p per share including the related tax credit) declared on 30 January 1986 and paid on 4 April 1986. The cost of the first and second interim dividends amounts to £15.0m (1985—£13.4m).

The Boat comes in for Docklands

Buoyancy of London's waterfront property market

highway since pre-Roman times, the Thames has been called liquid history; a more appropriate epithet now would be liquid gold because of its effect on London's waterside property market.

Today, this is a comparatively recent phenomenon. When the river, London's main commercial thoroughfare and, indeed, its open air, its banks were about as desirable for residence as the shoulders of a motorway are now. Barge basins, warehouses, barnacled wharves, jetties, unsavoury sailors' inns - the adjective applied equally to the tarts and bars - damp and squalid slums characterised the banks of the polluted stream carried more dead dogs than live fish.

Now clean and clear, with even an occasional salmon sighted at a time, the Thames is recognised as the metropolis's most valuable natural amenity. From Greenwich to Kew, developers have discovered they can put a price premium on it.

Years ago, a regeneration programme has transformed slums and derelict warehouses into desirable residences.

Pioneer agents who blazed the trail there have flourished. When Martin Carleton Smith decided to set up shop in the heart of Docklands in January 1983, it was considered a brave, even rash, decision. Now Carleton Smith & Co has

a wide portfolio of property but nevertheless has to struggle to keep abreast of demand from City executives.

Similar success has been achieved by the Docklands Property Centre whose growth record has been little short of phenomenal - helped, no doubt, by a well-chosen name.

Seville describes the prices now recorded - £350,000-£500,000 for a four-bedroom apartment on the waterfront - as "staggering" and it is

shortly opening a new office there to handle properties on Clippens Quay, New Concordia Wharf and Oliver's Wharf.

Faster off the mark, Chestertons, another leading London estate agency, has already opened a Docklands office and assembled a substantial portfolio with a typical two-bed apartment at £240,000, and a three-bedder at Gun Wharf at £315,000. Manager Paul Austin says:

"The appeal of an open balcony on which to enjoy evening drinks and the view across the river is an attraction to everyone and

Gun Wharf

the price achieved by property offering this is very high."

A Chestertons purchaser, David Pallett, quantifies this starkly and simply by quoting the case of two identical apartments in the same development, one overlooking the river and the other at the back.

The property with the river view commands a price 20-25% higher. The former figure applies in winter; the latter in summer. The disparity occurs

because January's grey cold water did in swimming time has considerably less appeal than the blue sunshine-flecked stream of August. Besides, there is some vestigial folk memory of pre-embankment

days when "in summer the river is at the bottom of your garden and in winter your garden is at the bottom of the river."

The Thames Barrier protects the city from such hazards now, so one can ignore the risks and revel in the delights of running water; its infectious tranquillity, its hypnotic perpetual motion, its ever-changing currents and subtle pigments, its murmuring ripples, the romantic pulsing river craft, the vista and the big sky, uniquely, for London, unconfined by concrete and, for the practical, the opportunity to moor a boat, hook a fish or simply sit and

state. And the busier the City becomes, the greater will these serene attractions loom and the higher the premium paid for them.

Away from Docklands, there is consistently strong demand for Thames-side London apartments and houses all the way upstream through Blackfriars, Westminster, Battersea, Chelsea and beyond. New developments such as Margate Walk, Millbank Terrace and Beesborough Gardens are snapped up well before completion.

The latter two projects, together with Cowra Reach on Vauxhall Bridge, have proved particularly popular with MPs (because of their proximity to Westminster just a few minutes' stroll down the road) and with business executives because of the fast approach to the City and West End via the Embankment.

Chelsea, of course, with its literary and art associations has always been popular, and Seville currently offers a period house in Cheyne Walk once occupied by J. M. W. Turner. With unrivalled river views, the three-bedroom terrace with top-floor studio is priced at £500,000.

If you prefer new property, just a hop, skip and jump from the Chelsea Reach of the river is 'Waters' compact Parkside Walk development of eight wide-fronted terrace houses and two apartments. The houses, at £455,000-£510,000 from agents W. A. Ellis, offer four/five bedrooms, three bathrooms, cloakrooms, two large reception rooms and a fully-fitted Italian design kitchen. Each has its own small garden with sun terrace and a parking space in the communal garage. They're going so fast that a second phase is now planned for next year.

Specialist agency for waterfront property.

side houses, A. C. Frost & Co, boasts that once you have lived in a riverside home then, like a captive fish, you are likely to be hooked for life. If you do move, you will seek a similar riparian location. The trouble with that is that there is a grave shortage.

Working in London commute from the seaside instead; the most popular location, because of its unspoiled road and rail links with London, is Brighton. Consequently,

Chestertons has just undertaken its first major out-of-town project there, Rottingdean Place, formerly a convent, it was acquired by British Land in 1984 since when 43 apartments have been created with 14 new town houses constructed in a complementary style.

How is the market? "Buoyant," says Chestertons Managing Director Nigel Connell. Like all waterside property.

Your Private Ritz

An attractive alternative for the businessman

In the heart of Mayfair, between Grosvenor Square and Berkeley Square... a hop, step and jump from the prestige shops, boutiques and galleries of Bond Street and a few minutes' stroll from Park Lane... there couldn't be a better location than No 1 Carlos Place. And there couldn't be a nest of apartments more chic than the eleven just opened there.

The mix ranges from a one-bedroom, via three- and four-bedroom duplexes, up to a dream of a penthouse with accommodation for six, including reception/dining area, split-level living room, garden path, three bedrooms and three bathrooms.

Each unit is individually designed, and extravagantly furnished, decorated and carpeted, with fully equipped kitchens and bedrooms with showers. They are ready for immediate occupation, right down to china, cutlery, glass, bed linen and kitchen utensils.

It's an attractive alternative to a five-star hotel for the business executive and his family seeking more space, independence, privacy and comfort

without forgoing hotel standards. So No 1 Carlos Place provides 24-hour portage, with security cameras on each floor, daily cleaning with fresh towels and linen, colour TV and video with video film services, switchboard telephone plus a direct line.

If you want chauffeur, child minder, theatre seats, taxis... they can all be arranged through the office.

Let us daily rates, with special arrangements negotiable for longer terms, the refurbishment has taken four months and the result is not so much a block of flats, more a competitor to the Dorchester, Ritz, Savoy, Claridges and the Connaught just a few yards away.

Alec Snobel

Clippens Quay, Isle of Dogs, London E14. A development which leads into the Millwall Dock, where windsurfing, water skiing and sailing are already established pastimes.

HOLLAND VILLAS ROAD, LONDON W.14

A magnificent and immaculate freehold London house.

Drawing room, dining room, study, games room, with swimming pool and sauna, master bedroom suite, second bedroom suite, 2 further main bedrooms and third main bathroom, guest suite, staff bed-sitting room. West facing landscaped garden. Passenger lift.

THE ELEGANT SHAPE OF THINGS TO COME
London, England is recognised as one of the prime property markets in the world. Award-winning Barratt Central London Ltd. will soon be building more beautiful new homes with real investment and rental potential in Fulham, SW5 - an increasingly fashionable and popular area on the borders of Kensington, Chelsea and Knightsbridge.
The locations have been carefully chosen for the development of superb luxury town houses, including a grand square and a magnificent terrace. In complete contrast to these locations, a range of 2, 3 & 4 bedroom houses will be available, all having at least 2 bedrooms and many even 3.
Our first phases are due to be released this Fall '86. Overseas investors now have the opportunity to make "Early Bird" reservations earmarking properties of their choice before the main marketing campaign begins. A rental service will be available.
Provisional plans and architects drawings are available for you or your representatives to view at our Fulham Sales Centre, Brampton Park, Stagshead Road, London SW6 (Tel. London 381 8565) or call Barratt Central London.
Anticipated First Phase prices:
2 bedrooms, 2 baths £200,000 - £250,000
3-4 bedrooms, 2 1/2 baths £285,000 - £350,000

"When a man is tired of London he is tired of life; for there is in London all that life can afford." — Samuel Johnson, 20th September 1777

What Renters can learn from Schools

A lesson in lettings for executive relocation to London

London is a score of villages, but for International Man looking for a temporary rented home there, only a few are significant. For the bachelor, accessibility to the financial centres of the City of London is a key factor. That does not necessarily mean proximity, although the emergent docklands developments and, on the fringe, Islington, now offer this. More important in the congested metropolis where a car can be a burden is public transport, which serves well the traditional prestige residential environs of Mayfair, Belgrave, Kensington, Regent's Park, and, more recently, Holland Park.

For families, apart from a preference for houses rather than apartments, there are two other criteria affecting choice, often chauntistically referred to as the petcock factor; what this means is that the property should ideally be within walking distance of Harrods or providing easy access to an ethnic school.

Thus, virtually all executives on a working assignment in London welcome rentals in the chic Knightsbridge near the great store, depending on availability of suitable property, of course, and on their scale of corporate accommodation allowances. Those with children, however, are likely to be swayed by the location of appropriate educational facilities.

Thus, Americans are drawn to the neighbourhood of the American School in London Road, NW8, which embraces

den Suburb, or within easy reach of the Northern Line Underground which serves Mornington Crescent. Likewise, Germans seek proximity to the German school at Petersham, near Richmond, and Swedes to their school at Barnes.

Whatever the new arrival's requirements, agents such as Montpelier Executive Home Search will help him find the appropriate relocation at any specified rental level.

There are, in fact, three common types of accommodation in the central location: serviced flats (like hotels); serviced flats within an apartment block that also does company lets; private homes and other flats available for rent on holiday let basis but not usually serviced.

Robert Bruce, a major agency in this field, has undertaken a careful analysis of prices and the resulting guidelines are as follows:

Accommodation	No. of Bedrooms	Range of Rental per week
Service Flats	1	£420-£1,400
	2	£500-£2,000
	3	£750-£2,500
Service Flats within an apartment block that does company lets	1	From £450
	2	From £500
	3	From £650
Short term accommodation in private homes and flats	1	£150-£450
	2	£450-£2,000
	3	£600-£3,000
	4	£1,000-£3,000
	5*	£1,000-£5,000

attraction of such investment capital appreciation. I past two or three years dizzing annual rate of growth in prime London real estate has been up to 10% in some locations, even 15%.

Furthermore, as evidenced by Roland Quirk, agents take away all hassle, after acquiring appropriate property, putting a package of interior decoration and furnishings in tenancy and giving true free management. It's a few investors can refuse.

Alex Sui

at the time, as Anson and Ringland Court, one of two spectacular apartment blocks within Hampstead's new F1 crest development. Built five floors, it contains panoramic views over the open spaces of Hampstead Heath. The block includes four luxurious duplex on the ground and first floor flats and a spectacular spacious penthouse. With three bedrooms and two bathrooms, the flats have sweeping terraces of about 35 ft and the duplexes have their own terraces and courtyards opening onto private gardens.

Units are priced from £365,000 to £450,000, with the showflat complete with fixtures, furnishings and fittings for £400,000.

From a portfolio built with some of London's best properties, Beauchamp Estates highlights a truly spectacular house at 6 Heath Terrace in Regent's Park. Exclusively reserved, retaining the period features the pillared porch with its room-dressing suite and a bedroom/bathroom suite also includes separate self-contained flat and a gymnasium (continued facing page)

A Rare Event - A Moated Castle comes up for Auction

very Englishman's home may be said to be his castle, but it is rare for a genuine and beautifully preserved moated English castle to come onto the property market. Thurland Castle, however, offers an opportunity to convert this Grade II listed into a 50-bedroom hotel or similar venture, all planning permission.

original site of the castle is thought to date back to the eighth or ninth century. The building itself was erected in stone from the 14th century and is situated in a nearby village of

Nick Whip of the company, describes the castle as "One of the most significant sites in the area, resting in glorious isolation at the

meeting point of 3 areas of outstanding natural beauty - the Lakes, the Yorkshire Dales and the Lune Valley." Although the castle is situated in a scenic beauty, the M6 motorway is only 9 miles away and Manchester Airport is just an hour's drive. 13 miles to the south is Lancaster, which provides excellent shopping facilities and a thriving business community.

The building boasts every conceivable type of accommodation, including billiard and music rooms and a private

chapel. There is a guest wing, a tower and stabling, in fact all the facilities for pursuits such as fall-walking, riding, shooting and fishing to be enjoyed to the full.

The moated boundary

between itself and any would-be intruder, makes Thurland ideally secure as a hotel, conference centre or indeed one of the most individual private homes imaginable.

Thurland Castle

The Pressure on Prices

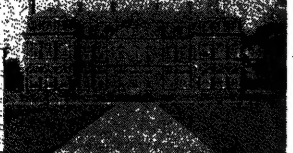

(and from facing page)

to satisfy the most sophisticated iron-pumping health price? Says the agency: "The market is in a more moderate level, is just starting on four developments at valuable in Fulham acquired by us. It is planning high location four/five bed-two/three bathroom

townhouses and news terraces which will sell at £250-£350,000. Aimed at overseas investors as well as foreign nationals working in London, the units are sure to show immense capital appreciation, but the popular developers are releasing them in the next few weeks so that first buyers will benefit from a fixed price 6-9 months ahead of completion.

Swohy Cowan have two Residential Offices between them covering the whole of Central London. The West End Office is based at 9 Cavendish Square, W1 and covers the area to the west of Regent Street, whilst the Covent Garden office is in Monmouth Street, WC2 handling all properties on the eastern side.

Both offices provide a personalized and professional service covering all aspects of sales, lettings and management of residential property. The Offices are computer linked to each other and to the London Residential Agents Shared Property Register.

Chateau de Remailly, Picardy, northern France, former home of international designer Laura Ashley and her husband, Bernard Ashley.

of properties priced at £250,000-plus from 50 central agents in the Regents Park, Hampstead, Highgate, St John's Wood area. For a fee of £100, it can extract from the data bank details of properties meeting your specifications.

When the right property is found and bought, a further commission of 1% is payable. If you're looking beyond North-west London, don't go to Regent's Estate but to Four Square Design, of Birmingham, which represents Grinley & Son of Brussels.

It's a roundabout route to the late Laura Ashley's French Chateau de Remailly. Grinley is handling the sale of this 18th century architectural gem. In 35 acres of land in unspoilt Picardy, the chateau includes 12 bedrooms, five bathrooms and four reception rooms. The coach house and stable block, which are linked to the main building by a tunnel, have been converted for conference and office use. The grounds contain a tennis court, an avenue of limes, a walled kitchen garden and delightful flower gardens. Price: £350,000.

BUSINESS ROUNDUP

Allianz Group Net Rose 8.2% in '85

MUNICH — Allianz AG, the large West German insurance group, said Thursday that domestic group premium income rose 8.2 percent to 9.8 billion DM last year, from 9.0 billion DM in 1984.

The company said it would pay a dividend of 12 DM on the results, versus 11 DM the year before.

In 1985, Allianz's pretax underwriting profit in the domestic group rose 7 percent, to 302 million DM, from 169 million DM in 1984.

The managing board chairman, Wolfgang Schäfer, said the increase was due to the absence of any single major accident or disaster requiring large claim payments, such as the July 1984 earthquake in Munich which cost Allianz 315 million DM in claims.

Another reason for the increase, he said, was an improvement in profit in reinsurance business.

Allianz also reported that domestic group premium income rose 8.2 percent to 9.8 billion DM last year, from 9.0 billion DM in 1984.

The domestic group comprises the parent company and all major West German units except Allianz Lebensversicherungs-A.G., the company's leading life-insurer.

Mr. Schäfer said that Allianz had contacted several U.S. companies about a possible acquisition, but so far had not entered concrete talks in its efforts to expand there.

Last month, Allianz announced a 1-for-15 rights issue aimed at financing further acquisitions abroad following its 1985 purchase of Rinnovo Adriatica di Sicurtà S.p.A., the big Italian insurance group, and its 1986 purchase of the British insurer, Cornhill Insurance PLC.

Allianz said at the time that it had no particular target, but was interested in the North American and Japanese markets.

Mr. Schäfer said that Allianz is interested in expanding there because its presence is weak and that two-thirds of world-wide premium income from private policies stems from these regions.

He said that Allianz would like to expand its financial service activities in West Germany, although it does not want to challenge the business of the nation's banks.

The chairman also said that Allianz expects its 1986 dividend to at least match that of 1985 based on projections of good results this year. "We wouldn't have raised the dividend in 1985 if we hadn't been certain we could hold this level" in 1986, he said.

U.K. Delays Sale Of Water Firms

The Associated Press

LONDON — Britain has postponed plans to sell the water companies of England and Wales in its drive to decentralize industry. Environment Secretary Nicholas Ridley said in Parliament Thursday.

The first of the 10 government-owned water authorities had been expected to go on the market later this year in a project expected to earn the government more than \$5 billion (about \$9 billion).

In a surprise statement, Mr. Ridley said the sale had been postponed because "more time is needed to prepare the necessary legislation." He said the government intended to proceed with the plan "as soon as practicable."

Lombard Reports 0.5% Profit Rise For Half Year

COLOGNE — Lombard PLC reported Thursday that its group net profit rose 0.5 percent from 1985 to 1986, to 1.1 million DM (1.1 million DM), from 1.0 million DM the year before.

Volume rose 12.5 percent, to 14.4 billion DM, from 12.8 billion DM. Ford Werke made a 10 percent contribution to the increase, but production and unit sales, The managing board chairman, Daniel Goevedert, said the increase was achieved through price increases and a better mix of models on offer.

Ford Werke's Net Loss Narrowed in 1985

COLOGNE — Ford Werke AG reported Thursday that its group net loss narrowed in 1985 to 251 million DM (251 million DM), from 261 million DM the year before.

Volume rose 12.5 percent, to 14.4 billion DM, from 12.8 billion DM. Ford Werke made a 10 percent contribution to the increase, but production and unit sales, The managing board chairman, Daniel Goevedert, said the increase was achieved through price increases and a better mix of models on offer.

Mr. Goevedert said that Ford Werke, a 99 percent owned subsidiary of Ford Motor Co., had turned a profit so far in 1986. He did not disclose details.

The finance director, Gerald Toepfer, said Ford Werke expects to show a profit in 1986. He made no specific forecast, but said that the 1986 profit would not be sufficient to wipe out losses of 549.1 million DM carried over from 1984 and 1985.

Mr. Goevedert said 1985 had been a year of adjustment to external handicaps for Ford Werke. The

company had to convert its early in the year forced the company to make last-minute changes to its 1985 financial statements.

Mr. Goevedert said that Ford Werke's share of the domestic car market fell to 10.9 percent in 1985 from 12.5 in 1984.

Lords Say Trustee Savings Can Float Stock

LONDON — The House of Lords cleared the way Thursday for the public flotation of shares in Trustee Savings Bank when it dismissed depositors' claims that they owned the assets of the 160-year-old institution.

The decision upholds rulings by the banking group, expected to raise £1 billion (£1.5 billion), originally was scheduled for last February but was delayed because of the legal battle.

Five lords, acting on behalf of the upper house that sits as Britain's final court of appeal, decided that no current or future depositors have rights, title or interest in the bank's assets, apart from capital and interest in their accounts.

"This is a big step forward for the TSB group and will be anxious to get the legal uncertainty cleared up," the TSB chairman, Sir John Read, said after the decision. "The decision upholds the bank's position and will allow the Treasury to set a date for the public sale."

A lawyer for a depositor, James Rose, who appealed on behalf of TSB's Scottish branch, said that his client might again raise the issue at the European Court of Human Rights in Strasbourg, France, where citizens of European Community member nations can seek redress.

"He has asked me to say that he still thinks it is grossly immoral that the results of 160 years' savings should be given away to speculators," said the lawyer, John Howells.

"He has asked me to say that he still thinks it is grossly immoral that the results of 160 years' savings should be given away to speculators," said the lawyer, John Howells.

Elders Sells Share In Kidston Mines

MELBOURNE — Elders Resources Ltd. has sold a 15 percent stake in Australia's largest gold mine, Kidston Gold Mines Ltd., for 112.2 million Australian dollars (\$73.3 million), Elders Resources managing director, Geoff Lord, said Thursday.

Mr. Lord said the 18.75 million shares had been sold on June 30 at 5.985 dollars a share to the Sydney brokerage firm of Bain & Co., and then by Bain & Co. to a variety of local and offshore buyers.

A Bain & Co. source said the share price was a 5-percent discount on the closing price on June 27. He said Bain had approached Elders Resources with the proposal to sell. The Kidston stake had been widely dispersed and no substantial shareholder notices would be necessary from purchasers, he said.

American Express Bank Ltd. has bought a 40-percent stake in International Corporate Bank, which was previously wholly owned by the Philippine National Development Corporation (PNDC). The 40-percent share was equivalent to \$16 million, the bank's seventh-largest commercial bank in the Philippines.

Associated Dry Goods has agreed to pay its two investment bankers, Goldman Sachs & Co. and Shearman & Sterling, as much as \$6 million each if they can find a "white knight" to rescue the New York retailer from the advances of May Department Stores.

Also on the Dutch chemicals group, said it is a joint venture in the United States to manufacture and sell materials in the worldwide electronics market. Both the French government computer group, plans to acquire a 40-percent stake in the Spanish information-technology company, Telespino. The agreement is subject to both governments' approval.

Great Atlantic & Pacific Tea Co. said it had completed the purchase of a majority of Shopwell Inc. through its 331-a-share offer. The company said it would not take this more than 10 percent of the company's share.

Gruppo Ferruzzi's proposal to increase its stake in S.W. Berford PLC will be referred to the British Monopolies and Mergers Commission. Ferruzzi of Italy, which holds 23.7 percent of Berford, said last week that it had approached the Office of Fair Trading about increasing its holding and purchasing a Berford unit, British Sugar PLC.

Kaiser Steel Corp. said that its four banks had granted an extension to nearly \$11 million in overdue loans and that the company was trying to develop several long-term financing plans. Kaiser now has until Aug. 31 to make its loan payment, which had been scheduled for Monday. Kaiser agreed to omit its dividend for the second time.

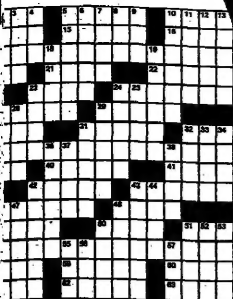

Rohment International PLC said its West German subsidiary, Rohment Deutschland GmbH, had granted an extension to nearly \$11 million in overdue loans and that the company was trying to develop several long-term financing plans. Kaiser now has until Aug. 31 to make its loan payment, which had been scheduled for Monday. Kaiser agreed to omit its dividend for the second time.

United Airlines has acquired the TS-2000 Travel Systems business of McDonnell Douglas Corp. The terms of the agreement, under which the TS-2000 unit will become part of the United's Apollo Services organization, were not disclosed. TS-2000 makes a package of travel-agency accounting and management software.

THE MENACE

NO TO THE PUBLIC FOR... WHO'S RICHARD STANZ?

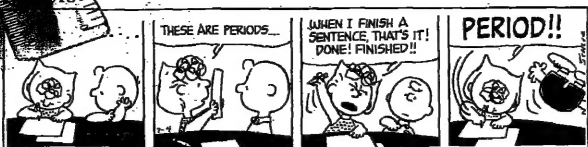

DRINKS

COINTREAU had spent its early days in the towers of Manhattan within the space of COINTREAU MARGARITA, our very first cocktail. We could break away from the fast-paced life of New York City and enjoy a drink of Cointreau, a liqueur of orange-flavored brandy, with a dash of lemon juice served in a chilled glass rimmed with salt. Suddenly, Mexico seemed so much closer to our penthouse in the city.

WHO GOES OUT IN THE MIDDAY SUN?

An Englishman's Trek Through the Amazon Jungle.

By Benedict Allen. Illustrated. 249 pages. \$18.95. Viking Inc., 40 West 23d Street, New York, N.Y. 10010.

Reviewed by Michiko Kakutani

WHEN I first heard his name, Benedict Allen, "Amazonia was a land of steamy jungle on the equator inhabited by naked savages. All the savages were headhunters and most would eat each other given the chance. The fiercest of them were tribes of women warriors who cut off their right breasts to fire their arrows with greater ease. Their targets were mainly explorers, who roamed the forest in search of gold. But among these primitives were some Good Indians, and because explorers gave them presents of salt (hard to get in the jungle) they guided the white men through the wilderness." That's how Allen saw the Amazon when he was 10 years old, and a dozen years later, still hungry for adventure, he satisfied his curiosity by going there and making a 1,000-mile journey through the jungle with a camera.

As Paul Fussell observed in his splendid book "Abroad," British travel writing has long and distinguished traditions, and in the hands of such gifted practitioners as Evelyn Waugh, Graham Greene and D. H. Lawrence, it has proved to be a wonderfully accommodating genre, allowing the writer to mix up straightforward reportage with autobiography, history, polemic and sometimes downright fantasy. In the case of "Who Goes Out in the Midday Sun?" Allen seems to have constructed a description and imaginative reminiscence — to the exclusion of almost everything else. There are only the briefest and most perfunctory references to facts and historical events in this volume — a few allusions to local history and former explorers — and equally scant allusion about Allen himself. He tells us that his boyish passion for fossils led him to tramp about the cliffs of Lyme Regis in search of specimens, that he used to grill schoolyard parents about their adventures abroad, that he went on a couple of research expeditions (to Costa Rica and Brazil) as a college student. And that's about it, as far as personal revelation. Beyond mentioning his childhood fascination with the Amazon, Allen

never explains what drove him to undertake such a perilous journey. There are glimpses of him facing down Amazonian rip-off artists and commiserating with the Indians about the evils of civilization, but very little about what he really thinks or feels. Even at his most homesick, Allen limits his meditations on England to the most generic sort of references — what Big Ben looked like or what Queen Elizabeth might have said on such and such an occasion. Because Allen is so reticent about himself, the reader misses the experience of watching a well-defined sensibility collide with an alien environment (the basis for so much of, say, Waugh's travel writing), and because he tends to be so evenly right-lipped about documentation, one also comes away with the feeling that his account may be less grounded in fact than it purports to be. Yet if one reads it in the spirit of a comic novel — a sort of Lucky Jim Goes to the Amazon — "Who Goes Out in the Midday Sun?" is thoroughly enjoyable, intermittently touching and frequently very funny.

Despite the book's somewhat slapdash construction, Allen has succeeded in finding an engaging comic voice — wry, self-deprecating and well-tuned to the absurdities of his quixotic situation. He describes his admiration for an explorer called Jangle Eddie McGee: "He would treat mount ever the peak with a camera. On top of the coldest he would sprinkle the black spores of putrefaction, and the reader would see him through the jungle. He was that sort of man." He recalls his introduction to a group of Indians who were about to guide him through the jungle. "You can help him by teaching all you know about the forest," his sponsor tells them, "how to find the way, how to find the path, a dugout, and how you hunt. He knows nothing of these things. His land is cold and barren. The sun rises at all seasons for half the year it is a white desert, and everything dies." And he replies, as well, a local Indian initiation rite — involving a wrestling match with a pig — that he's forced to undergo. "I imagined something the size of a horse, breathing in grunts, with yellow teeth jutting out like a pincushion, fresh from the forest. It was screaming, and the screams were a lovely cry for help. Never say die, piggy, I thought. Look who you're up against."

As he makes his picturesque journey from the mouth of the Orinoco River, across the delta, and through the jungles of the Guianas to the mouth of the Amazon, Allen encounters just about every horror imaginable: carnivorous fish, bloodthirsty jaguars, dead bodies (human and animal), vampire bats, scorpions, ants, parasites and mosquitoes. He spends a night in a cave filled with "necklace-length" centipedes, dines on fried locusts, white tree grubs and roast monkey, and after losing his supplies, nearly dies of malaria and starvation. By then, he observes, he's discovered that the real threat in the Amazon lies not with the hostile tribes he imagined as a boy — indeed he manages to survive only with the help of several Indian friends — but with the gold miners, fortune-hunters and proselytizers for the West who have tried to tame the land and exploit its people for their own ends.

BRIDGE

By Alan Truscott

ON the diagrammed deal the lead against South's contract of four hearts was the club jack, which held the trick. The club king was taken and a spade shift went to the queen in the closed hand. South ruffed her last club, cashed the heart king and led the jack for a finesse. This brought good news and bad news. The finesse won, but East's queen could not be captured by direct means. South player demonstrated, however, it could be done by indirect means. The diamond four was led, and East played the queen, she crossed to the spade ace, and East's trumps were duly spade to reach this ending:

Kent State Controversy

CAFE TALIA

A map of San Francisco, California, showing the city's layout and surrounding areas. The map includes labels for Fisherman's Wharf, San Francisco Bay, North Beach, Russian Hill, Chinatown, and San Francisco. It also shows major streets like Beach St, Bay St, Broadway, and Market St. The map is credited to The New York Times.

The strip has opened night clubs featuring male strippers or rock music bands that operate into the early morning hours, drawing thousands of young people, mostly from the suburbs. There have even been some growing pains from local residents who have complained that the strip's best-known topless dancer, Carol Doda, once a kind of San Francisco landmark, is among those who have been left without a stage by the economic shifts on Broadway.

Now that the area has become "punk city U.S.A.," she said, she finds it more difficult than ever to meet unattracted heterosexual couples in San Francisco. "I've been disappointed out that Alaska had a surplus of single men," she said. "I've heard that, but I've afraid to go up there. My silicone expands in the heat, and I'm afraid it would contract in
